APPLICATION: Our multi-conductor, all in one generator cables are great labor savers for quick installations and can replace two separate cables. The conductors are color coded to match Generac® generator connections but may be used on other generators requiring the same gauge wire.

Key cable ratings include: Direct Burial, JP (Joist Pull) Rating, Sunlight Resistant, TC-ER-JP.

The cable is available in standard lengths and bulk reels to minimize your cutting scrap.

SJOOW & SOOW Portable Cord, DLO, Type W and Extension Cords always in stock
